PART A — FOUNDATIONS

Chapter 1: What is Vastu Shastra?

Vastu Shastra is the ancient Indian science of architecture and spatial arrangement. The word **Vastu** derives from the Sanskrit root *Vas* — meaning "to dwell" or "to inhabit." Shastra means "science" or "scripture." Together, Vastu Shastra means the **science of dwelling**.

It is not a religion. It is not superstition. It is a systematic study of how the physical structure of a building — its orientation, proportions, room placement, and spatial relationships — affects the health, prosperity, and harmony of its occupants.

Core Principle: Every structure exists within the forces of Nature — sunlight, wind, water, gravity, and electromagnetic fields. Vastu Shastra aligns the building with these natural forces so that the occupants benefit from them rather than resist them.

Ancient Sources

Vastu Shastra is recorded in several ancient Indian texts called **Vastu Agamas**. The primary texts are:

Text	Tradition	Key Content
Viswakarma Prakashika	Viswakarma tradition	Padavinyasa, 32 Devathas, Ayadi calculation
Manasara	South Indian	Town planning, temple design, house Vastu
Mayamata	Maya tradition	Residential Vastu, proportional systems
Samarangana Sutradhara	North Indian	Palace design, fort planning

Samartha Vastu is based exclusively on the Viswakarma Prakashika — the most scientifically precise of all Vastu texts, employing proportional geometric calculation (Padavinyasa) rather than angular division.

Chapter 2: Vastu Purusha — The Origin Story

The Mythology

According to Vedic tradition, during a great cosmic war between the Devas (divine forces) and Asuras (demonic forces), Lord Shiva fought the demon Andhakasura. From the sweat of Shiva's forehead, a gigantic being was born — vast, powerful, and overwhelmingly hungry.

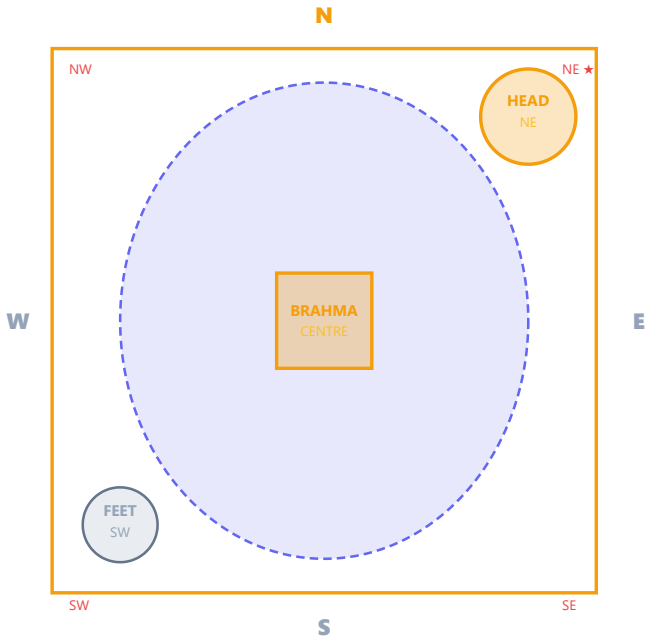
This being — the **Vastu Purusha** — demanded permission from Lord Shiva to devour the three worlds (Triloka). Frightened, the Devas appealed to Lord Brahma for protection.

Lord Brahma, assisted by the **Ashta Dikapalas** (the eight guardians of the eight directions), commanded 45 divine beings to pin the Vastu Purusha face-down upon the earth. He was pinned with:

- Head toward the **North-East** (Ishanya — most sacred direction)
- Feet toward the **South-West** (Nairutya — most stable direction)
- Lord Brahma himself sitting at the **centre** (Brahma Sthana)

> **Symbolic meaning:** Vastu Purusha represents the living energy within every plot of land. When a building is constructed correctly according to Vastu principles, the Vastu Purusha is at peace — and the occupants prosper. When the building violates Vastu, the Vastu Purusha is disturbed — and the occupants suffer.

Vastu Purusha on the Plot



Chapter 3: What is Padavinyasa?

Padavinyasa (पादविन्यास) comes from two Sanskrit words: *Pada* (step or unit of measurement) and *Vinyasa* (arrangement or placement). It is the method of arranging the 32 Devathas (divine guardians) proportionally around the perimeter of any plot or building.

> **Key Principle:** In Padavinyasa, the Devathas are placed PROPORTIONALLY along the actual wall lengths — not at fixed angular positions from the centre. A 30-foot wall and a 60-foot wall will have different Devatha spans even though they face the same direction.

How Padavinyasa Works

Each side of the plot is divided into 9 units called **Padas**:

Position	Devatha Count	Notes
Each corner	½ Devatha (shared)	Corner Devathas are split between two sides
Each side (between corners)	7 full Devathas	Spans proportional to wall length
Total perimeter	4×½×2 + 4×7 = 32	32 unique Devatha positions

The chain runs: **NE → SE (East face) → SE → SW (South face) → SW → NW (West face) → NW → NE (North face)**

Chapter 4: Why Sakkhi Chakra is Scientifically Wrong

> ⚠️ **Special Note — Scientific Proof**
>
> This chapter presents the original research by the creators of Samartha Vastu, validated by independent scientific analysis. The Sakkhi Chakra method, used by most North Indian Vastu software, contains fundamental geometric and geographic errors.

What is the Sakkhi Chakra?

The Sakkhi Chakra is a circular tool that places Devatha positions at fixed angular intervals (22.5° each for 16 zones) radiating from the centre of a plot, using a magnetic compass to determine North.

Proof 1: The Parallel North Proof

Geographic directions (North, South, East, West) are defined by lines of **latitude and longitude** — which run as parallel lines across the entire surface of the Earth.

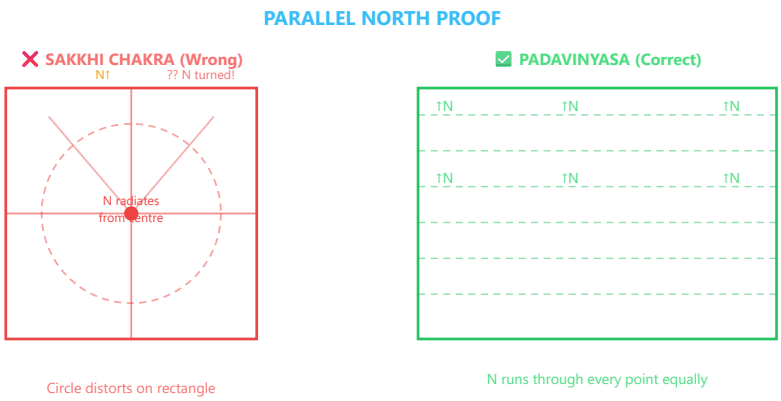
```
Stand at the SW corner of your plot.
Your compass shows 0° North.

Walk 50 feet to the SE corner.
Your compass STILL shows 0° North.

Walk 100 feet to the NE corner.
Your compass STILL shows 0° North.

The North direction runs through EVERY POINT of
your plot like parallel railway tracks.

It does NOT radiate from the centre.
It does NOT change based on plot shape.
It does NOT rotate when the plot is elongated.
```



Latitude/Longitude lines are always parallel — direction is a constant, not a point

Proof 2: The Rectangle = Two Squares

```
A 30×60 rectangle is simply two 30×30 squares joined:

[SQUARE 1] + [SQUARE 2] = [RECTANGLE]
  30×30        30×30        30×60

East wall of Square 1 = 30ft, faces East ✅
East wall of Square 2 = 30ft, faces East ✅
```

```
Therefore:
East wall of Rectangle = 60ft, faces East ✅

The East did NOT turn for Square 1.
The East did NOT turn for Square 2.
Therefore the East CANNOT turn for the Rectangle.

Q.E.D. — Geometric proof. Undeniable.
```

Proof 3: Magnetic Compass is Unreliable

City	Magnetic Declination	Error on 40ft wall
Delhi	+1.31°	~11 inches error
Mumbai	−0.84°	~7 inches error
Hyderabad	−0.51°	~4 inches error
Bangalore	−0.55°	~5 inches error
Chennai	−0.33°	~3 inches error

Additionally: Steel reinforcement bars, electrical wiring, water pipes, and mobile towers all deflect the compass needle. A compass reading taken inside or near a constructed building measures **iron and electricity** — not the Earth.

Historical proof: The Viswakarma Prakashika was written over 3,000 years ago. The magnetic compass arrived in India approximately 900–1000 AD — 2,000 years AFTER the Vastu texts. The original method for finding North was the **Shanku (Gnomon)** — a vertical stick whose shadow gives exact astronomical True North. This is identical to what modern GPS satellites provide.

Chapter 5: True North vs Magnetic North

❌ Magnetic North (Compass)

Points to the magnetic North Pole

Drifts up to 25° per century

✅ True North (Astronomical)

Points to geographic North Pole

Fixed — never changes

Deflected by steel, wiring, metal

Different in every city

Changes measurement year to year

Used by Sakkhi Chakra — no Vedic authority

Not affected by materials

Same everywhere on Earth

Same measurement every century

Used by Viswakarma Prakashika — Vedic authority

In Samartha Vastu: Enter your site's True North degree from Google Maps satellite view or survey document. The software uses this exact value for all 32 Devatha calculations. If you only have a compass reading, use the Magnetic Declination correction in the Site Geometry section.

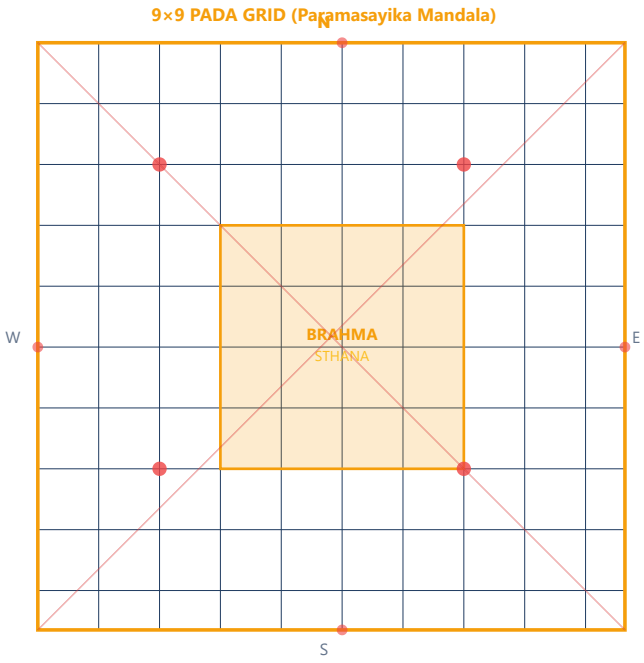
PART B — THE PADAVINYASA SYSTEM

Chapter 6: The 9×9 Pada Grid

The fundamental unit of Vastu planning in Viswakarma Prakashika is the **9×9 Pada Grid** — also called the **Paramasayika Mandala**. It divides the plot into 81 equal squares (padas).

Zone	Location	Deity	Significance
Brahma Sthana	Centre 4 padas	Brahma	Most sacred — must remain open
Outer ring	32 perimeter padas	32 Devathas	Govern entrances and activities
Middle ring	28 intermediate padas	12 inner Devathas	Internal energy distribution
Marma Sthanas	8 specific intersections	—	Sacred joints — never pierce

Brahma Sthana Rule: The central 4 padas (Brahma Sthana) must always be kept open — no columns, no walls, no heavy storage. This is the breathing space of the house. In apartment buildings, this corresponds to the central courtyard or light well.



Chapter 7: 32 Devathas — Complete Reference

The 32 Devathas are divine guardians assigned to the 32 segments of the perimeter of any plot or building. Each Devatha governs a specific aspect of life and bestows auspicious or inauspicious effects depending on what activities are placed in their zone.

Complete 32 Devatha Reference Chart

#	Devatha	Direction	Rating	Best Use
1	Shikhi	NE Corner	❌ Inauspicious	Avoid all construction
2	Parjanya	East	★ Good	Water features, garden
3	Jayanta	East	★★ Best	Main entrance (E road)
4	Mahendra	East	★★ Best	Main entrance (E road)
5	Surya	East	○ Neutral	Study, reading room
6	Satya	East	○ Neutral	Study, office
7	Bhrisha	East	○ Neutral	Bathroom
8	Antariksha	East	○ Neutral	Open space
9	Agni	SE Corner	❌ Inauspicious	Avoid entrances
10	Pusha	South	○ Neutral	Dining, storage

11	Vitatha	South	★ Good	Main entrance (S road)
12	Gruhakshat	South	★★ Best	Main entrance (S road)
13	Yama	South	○ Neutral	Store room
14	Gandharva	South	○ Neutral	Music, arts room
15	Bhringraj	South	○ Neutral	Bedroom 2
16	Mriga	South	○ Neutral	Pet area
17	Pitra	SW Corner	❌ Inauspicious	Avoid entrances
18	Dauvarika	West	○ Neutral	Secondary entrance
19	Sugriva	West	★ Good	Main entrance (W road)
20	Pushpadanta	West	★★ Best	Main entrance (W road)
21	Varuna	West	★ Good	Dining, water features
22	Asura	West	○ Neutral	Store room
23	Shosha	West	○ Neutral	Drying area
24	Papayakshma	West	○ Neutral	Toilet (acceptable)
25	Roga	NW Corner	❌ Inauspicious	Avoid entrances
26	Naga	North	○ Neutral	Water tank
27	Mukhya	North	★★ Best	Main entrance (N road)
28	Bhallata	North	★★ Best	Main entrance (N road)
29	Soma	North	★ Good	Main entrance, water
30	Bhujanga	North	○ Neutral	Garden
31	Aditi	North	○ Neutral	Open space
32	Diti	North	○ Neutral	Store

Chapter 8: 16 Zones and Life Aspects

The 16 directions (N, NNE, NE, ENE, E, ESE, SE, SSE, S, SSW, SW, WSW, W, WNW, NW, NNW) each govern a specific area of life. Understanding these helps architects place rooms to maximise positive life outcomes for the occupants.

Zone	Direction	Life Aspect	Best Rooms

NE	North-East	Personality & Health	Puja Room, Open Space
ENE	East-North-East	Luck & Spirituality	Study, Meditation
E	East	Immunity & Creativity	Bathroom, Children's Room
ESE	East-South-East	Mental Peace & Education	Study Room
SE	South-East	Fire & Energy	Kitchen only
SSE	South-South-East	Finance & Family Status	Locker, Safe
S	South	Fame & Recognition	Bedroom 2, Dining
SSW	South-South-West	Disposal & Release	Toilet, Waste
SW	South-West	Stability & Relationships	Master Bedroom
WSW	West-South-West	Profit & Success	Study, Home Office
W	West	Gains & Contentment	Dining, Children
WNW	West-North-West	Rest & Recovery	Guest Room
NW	North-West	Support & Networking	Toilet, Guest, Store
NNW	North-North-West	Attraction & Relationships	Bedroom, Living
N	North	Prosperity & Reputation	Hall, Living Room
NNE	North-North-East	Challenges & Growth	Open space, Garden

Chapter 9: Marma Sthanas — Sacred Points

⚠️ **Critical Construction Rule:** Marma Sthanas are the vital joints of the Vastu Purusha — equivalent to the vital points (marmas) of the human body. No column, beam joint, well, septic tank, staircase newel post, or heavy structural element should be placed at a Marma Sthana. Violation causes structural and health problems.

The primary Marma Sthanas in the 9×9 grid are located at the intersections of the 3rd and 6th Pada lines — creating 8 points around the Brahma Sthana, plus the 4 corner intersections.

In Samartha Vastu software, Marma Sthanas are shown as red dots on the canvas. These update automatically based on your built area dimensions and True North rotation.

PART C — PRACTICAL APPLICATION

Chapter 10: Site Selection Rules

Plot Shape

Shape	Rating	Notes
Perfect Square	★★ Excellent	Equal energy on all sides
Rectangle (L>W by max 1:2)	★ Good	Most common — works well
Rectangle (L>W more than 1:2)	○ Acceptable	Proportional Padavinyasa handles this
Triangular	❌ Avoid	Cuts create energy imbalance
Irregular (random sides)	❌ Difficult	Requires expert Vastu correction
North-East extension	★★ Excellent	Extends the most auspicious corner
South-West extension	❌ Avoid	Extends inauspicious Pitra corner
North-East cut	❌ Avoid	Cuts the most auspicious corner

Road Direction Rules

Road Facing	Rating	Best Entrance Devatha	Notes
East	★★ Excellent	Jayanta (3rd), Mahendra (4th)	Morning sun — health and growth
North	★★ Excellent	Mukhya (27th), Bhallata (28th)	Prosperity direction
South	★ Good with care	Vitatha (11th), Gruhakshat (12th)	Requires correct Devatha placement
West	★ Good with care	Sugriva (19th), Pushpadanta (20th)	Acceptable with correct planning

Chapter 11: Room Placement Guide

Room Placement Master Chart

Room Type	Best Zone	Acceptable	Avoid
Master Bedroom	SW (9,10,11)	S, NW	NE, SE, Centre
Bedroom 2	S, NNW (12-15)	W, NW	NE, SE
Kitchen	SE (5,6,7)	NW	NE, SW, Centre
Puja Room	NE (1,2,3,4)	E, N	S, SW, SE, W
Toilet	NW (13,15)	SSW, W	NE, Centre, SW
Hall/Living	N, NE, E (0-4,14,15)	NW, W	SE, S
Dining	W, NW (6-9)	S, N	NE
Staircase	SW, S (8-14)	W	NE, Centre
Study Room	NE, E, N	W, NW	S, SW
Store Room	SW, NW, S	W	NE, Centre
Garage/Parking	SE, NW	W	NE, SW
Garden/Open	NE, N, E	NW	SW (heavy planting)

Chapter 12: Main Entrance — Dwara Selection

The main entrance (Dwara) is the most critical element of Vastu planning. It must be placed on an **auspicious Devatha** position. The best Devathas vary based on which direction the road faces.

Road Direction	★★ Best Devathas	★ Acceptable	✕ Avoid
East Road	Jayanta (3rd), Mahendra (4th)	Parjanya (2nd), Surya (5th)	Shikhi corner
South Road	Vitatha (11th), Gruhakshat (12th)	Pusha (10th), Yama (13th)	Agni corner
West Road	Sugriva (19th), Pushpadanta (20th)	Varuna (21st), Dauvarika (18th)	Pitra corner
North Road	Mukhya (27th), Bhallata (28th)	Soma (29th), Naga (26th)	Roga corner

In Samartha Vastu: Click any Devatha label on the canvas to set that Devatha as your main entrance. The software shows ★ Good and ✗ Bad ratings for all 32 positions. The

AUTO GATE button automatically places the entrance on the best auspicious Devatha for your road direction.

Chapter 13: Ayadi Shastra — Navavargulu

Ayadi Shastra is the mathematical system of calculating 9 astrological parameters (Navavargulu) from the house dimensions. These parameters determine the compatibility of the house with its occupants.

The 9 Parameters (Navavargulu)

#	Parameter	Auspicious Values	Calculation
1	Ayam (Yoni)	Dhwaja(1)★★, Simha(3)★, Vrusha(5)★, Gaja(7)★	Based on EW dimension
2	Aaya (Income)	Must exceed Runam (debt)	Formula from Viswakarma text
3	Runam (Debt)	Must be less than Aaya	Formula from Viswakarma text
4	Nakshatra (Star)	Should match owner's birth star	27 Nakshatras cycle
5	Tithi	Avoid 4, 8, 14, Amavasya	Lunar day calculation
6	Varam (Day)	Wednesday, Thursday, Friday best	Day of week calculation
7	Yoga	Siddha, Amrita, Shubha	Sun+Moon position
8	Karana	Fixed Karanas preferred	Half-tithi calculation
9	Ayusham (Age)	Higher value = longer-lasting house	Based on NS dimension

Yoni (Ayam) — Most Important: Dhwaja Yoni (1) is the most auspicious — represents a flag flying high. Simha (3) = lion, strength. Vrusha (5) = bull, stability. Gaja (7) = elephant, prosperity. Use the Dhwaja/Simha/Vrusha/Gaja buttons in Samartha Vastu to find dimensions that give auspicious Yoni values.

Chapter 14: G+1 Floor Planning

Samartha Vastu supports complete Ground Floor + First Floor (G+1) planning. Each floor has its own independent Padavinyasa calculation.

🏠 **Ground Floor (GF)**

Default view when app opens

Contains all main living areas

Separate room list, walls, labels

Independent Devatha calculations

🏢 **First Floor (1F)**

Click 1F tab to switch

GF rooms copied as template on first visit

Modify independently from GF

Printed separately in PDF report

Staircase Rule: Place the staircase in the same position on both GF and 1F. The staircase should be in the SW or S zone — never in the NE or centre Brahma Sthana.

PART D — CONSTRUCTION GUIDANCE

Chapter 15: 19-Step Planning Process

Viswakarma Vastu planning follows a precise sequence of steps — from the first site measurement to handing over the completed building. These steps ensure that every Vastu principle is applied correctly at every stage of construction.

#	Step	Vastu Purpose
1	Land boundary drawing with measurements	Establishes exact plot dimensions for Padavinyasa
2	True North determination via satellite/Google Maps	Accurate astronomical direction — not magnetic compass
3	Ayadi calculation for proposed dimensions	Ensures Yoni, Aaya, Runam are auspicious
4	Vastu Purush Mandala casting with Marma points	Identifies all Marma Sthanas before structural design
5	Client requirements — bedrooms, toilets, kitchen	Maps functional needs to Vastu zones
6	Main door (Dwara) position fixing	Places entrance on most auspicious Devatha
7	Initial sample drawing preparation	First Vastu layout for client review
8	Client discussion and modifications (5–6 rounds)	Balances Vastu rules with practical requirements

9	First floor plan preparation	Applies same Padavinyasa to upper floor
10	Column placement as per Marma Sthana	Structural columns avoid all Marma Sthanas
11	Foundation layout preparation	Foundation grid aligned with Pada grid
12	Structural drawings	All structural elements verified against Vastu grid
13	Interior and furniture placement as per Vastu	Furniture placed per zone rules
14	Internal wall colours by zone	Zone-appropriate colours enhance Vastu energy
15	Vastu correction (if required)	Remedies for any unavoidable violations
16	Foundation ritual guidance (Bhoomi Puja)	Auspicious Muhurtha for breaking ground
17	Construction stage support	On-site verification at key stages
18	Griha Pravesh preparation	Auspicious housewarming ceremony timing
19	Post-occupancy follow-up	Verify all Vastu elements properly implemented

Chapter 16: Muhurtha Basics

Muhurtha is the selection of an auspicious time for beginning important activities. In Vastu construction, Muhurtha is required for:

🌍 Bhoomi Puja

Foundation laying ceremony

Best Nakshatras: Rohini, Mrigashira, Uttara Phalguni, Hasta, Chitra, Swati, Anuradha

Avoid: Ardra, Ashlesha, Jyeshtha, Moola

🏠 Griha Pravesh

Housewarming ceremony

Best Nakshatras: Rohini, Uttara, Hasta, Swati, Revati, Uttarashada

Best Tithis: 2, 3, 5, 7, 10, 11, 13

🔨 First Column

Placing the foundation column

Must avoid all Marma Sthana positions

Best done on Monday, Wednesday, Thursday

🚪 Door Frame

Fixing the main door frame

Best on Thursday (Bruhaspativara)

Avoid Saturday and Sunday

Note: A complete Muhurtha guide based on Viswakarma Prakashika is available as a separate reference document from Samartha Vastu.

Chapter 17: Vastu Do's and Don'ts

20 Essential Vastu Rules for Every Client

✅ **DO's:**

1. Always enter True North degrees first — it shifts all 32 Devatha positions correctly
2. Place Master Bedroom in SW — the most stable, grounded zone
3. Place Puja Room in NE — the most sacred, pure zone
4. Place Kitchen in SE — fire element matches Agni zone energy
5. Keep Brahma Sthana (centre) open — no columns, no heavy load
6. Select main entrance on auspicious Devatha (★ Good or ★★ Best)
7. Place Borewell in NE compound wall corner
8. Place Septic Tank in NW or SSW zone
9. Place Staircase in SW or S zone
10. Achieve Vastu Health Score of 75%+ before finalising the plan

❌ **DON'Ts:**

1. Never place an entrance on corner Devathas — Shikhi (NE), Agni (SE), Pitra (SW), Roga (NW)
2. Never place Puja Room in SE, SW, S, or W zones
3. Never place Kitchen in NE or SW zones
4. Never cut the NE corner of the plot — removes most auspicious zone
5. Never place columns at Marma Sthana points
6. Never use magnetic compass for direction — use GPS/satellite
7. Never use the Sakkhi Chakra method — geometrically incorrect on rectangles
8. Never place heavy construction in Brahma Sthana (centre)
9. Never place Master Bedroom in NE — too much divine energy for sleep
10. Never finalise plan without Ayadi calculation — Yoni must be auspicious

PART E — SOFTWARE SPECIALITIES & SLOKAS

⭐

Software Specialities, Sakkhi Chakra Proof & Viswakarma Slokas

These topics are available in the dedicated **\"Why Different\"** document — accessible from the header button in Samartha Vastu.

The Why Different document contains:
10 Software Specialities · Scientific Sakkhi Chakra Proof · Side-by-side comparison · 3 Viswakarma Slokas with translations

Click ⭐ Why Different in the header to view
